

PADDED WAIST BELT OPTION

PADDED WAISTBELT

In 2004 we re-designed the waist belt on the Ultimate bag, made it dual adjust, padded and easily removable. To install the waist belt you should first pull some excess webbing over the hook Velcro on the padded waist belt, this will make the installation of the waist belt much easier since you will not have the hook Velcro on the waist belt getting stuck onto the loop Velcro in the waist belt square. Pull the wastrel through the square until it is in about the middle, then pull the webbing back through towards the buckle. You may have to feel around inside the waist belt square to get the buckle securing bungee cord. When you are not using the waist belt you can roll up the buckle in the webbing and secure it with the bungee cord.

To remove the waist belt you will have to use a ruler or some other object to release the Velcro inside the waist belt square.

TO INSTALL

PULL WEBBING TO COVER VELCRO

SLIDE WAIST BELT THROUGH LOOP

PULL THROUGH UNTILL WAISTBELT IS IN CENTER

ROLL UP BUCKLE IN WEBBING AND SECURE WITH BUNGEE CORD

TO REMOVE

SLIDE FLAT OBJECT UNDER WAIST BELT TO RELEASE
